Muhammad Amjad Khawaja

CEO / FOUNDER

Welcome to Khawaja Cotton Industries – It is a pleasure for me to have your interest and attention,

At Khawaja Cotton Industries, our journey is driven by a simple vision: to deliver quality, consistency, and trust in every thread we produce.

With a passionate team and state-of-the-art technology, we specialize in high-quality knitted apparel for global markets. Our strength lies in turning client ideas into reality through innovation, speed, and dedication.

We believe in building long-term partnerships, maintaining ethical practices, and constantly evolving with industry trends without ever compromising on quality.

Thank you for being a part of our journey.

Our Value

Vision

Our vision is to become a globally trusted supplier in apparel industry by consistently delivering superior quality products, embracing innovation, and upholding ethical and sustainable practices. We aim to build long-term relationship with our clients by exceeding expectation and continuously upgrading technology to meet the changing demands of the global market.

Mission

Our mission is to manufacture and deliver high-quality knitted garments that meet international standards through innovation, sustainability, and excellence. We adhere to environment friendly practices and believe in building long-term partnerships with our customers by delivering quality products and service.

COMPLIANCES

MANUFACTURING

1

KNITTING

Our facility is equipped with a diverse range of state-of-the-art circular and flat knitting machines, covering gauges from 14 to 28, allowing us to meet a broad spectrum of fabric requirements with precision and consistency.

Utilizing the finest quality yarns, our knitting department specializes in producing a wide variety of premium fabrics, including:

- Fleece
- French Terry
- Rib
- Jersey
- Interlock
- Pique
- Waffle
- Mini Waffle
- Flat Back Rib
- Jacquard (Both solid and dyed yarns)

MANUFACTURING

2

DYEING

Our dyeing unit features high-tech computerized machines designed for low liquor ratio, our skilled team ensure precision in dyeing/washing and finishing for fabric/garments. We source INDITEX “THE LIST” Category A compliant dyes and chemicals, aligned with global sustainability and safety standards.

We are proudly listed as Category A Supplier—ensuring full compliance with Restricted Substances Management standards. This strategic shift reinforces our commitment to sustainability, compliance, and product safety.

Our dyeing facility also features a state-of-the-art in-house laboratory, equipped with Data Color technology, enabling us to develop highly accurate and cost-effective dye recipes. Routine lab testing ensures that all dyed fabrics consistently meet stringent quality and RFT (Right First Time) parameters.

With a daily dyeing capacity of 18 tons, we maintain a seamless production flow while upholding the highest standards. Every batch of dyed fabric/garment undergoes thorough inspection, significantly reducing the risk of defects and ensuring client satisfaction throughout the production process.

3

EFFLUENT TREATMENT PLANT

As part of our commitment to sustainable manufacturing, Khawaja Cotton Industries has implemented a cutting-edge Electric Coagulation Plant within our dyeing facility. This advanced system allows us to effectively treat wet processing effluents in accordance with WTO environmental standards, significantly reducing our environmental footprint.

The plant plays a crucial role in our transition toward a Zero Liquid Discharge (ZLD) policy, ensuring that no harmful wastewater is released into the environment. By adopting this technology, we not only meet regulatory compliance but also actively contribute to cleaner, safer, and more responsible textile production.

4

PRINTING

Printing is one of the core specialties of Khawaja Cotton Industries, where innovation meets craftsmanship. Our dedicated printing unit is equipped with state-of-the-art automatic, computerized wet-on-wet motif printing machines, capable of delivering high-quality, multi-color designs with precision and consistency.

Our team of skilled professionals operating these machines has received specialized training from European printing experts, ensuring adherence to the highest international standards in print quality and technique by using ZDHC and ECO-PASPORT approved pigments and paste.

Our production capacity is 16K pieces per day.

5

EMBROIDERY

Our embroidery department is equipped with advanced SWF N Series embroidery machines, known for their precision, speed, and reliability. These 20-head machines are capable of producing between 6,000 to 9,000 pieces per day, supporting both single and multi-color designs, including solid fills and intricate appliqué work. Every embroidery panel undergoes a rigorous quality audit to ensure consistency and perfection.

6

CUTTING

Our modern cutting section is designed to deliver accuracy, efficiency, and consistency in every cut. Equipped with A latest computerized pattern marker “Gerber AccuMark” with full size plotter ensure minimum fabric wastage, Auto Spreader, Auto Cutter (Audaces Neocut Bravo machine) adapts to all type of materials including delicate fabric with ease and precision. All cutting panels are subject to cutting audit to save rejection of final garments at later stage.

7

STITCHING

Our Stitching facility houses over 300 auto trimmer multi operation machines, ensuring a highly efficient garment production. An independent, well-trained Quality Control team oversees every stage of stitching operation. Each garment undergoes in line and off line inspection.
